

Business Intelligence and Analytics

FORTUDE

Powerful business dashboards and reporting for data visualization, analytics and insights

Fortude's Business Intelligence (BI) technology empowers decision makers to visualize, analyze, and share complex data at the right time, accurately and consistently within the entire organization.

Fortude Business Intelligence Advantage:

KPI Management: Intuitive Executive dashboards and graphs for easy KPI management

Report & Dashboard Data: Secure data on Cloud and on-premise solutions

Faster Realization of ROI: Rapid BI methodology to ensure that benefits of implementation are derived in a short period

Query & Analysis: Data discovery, manipulation and exploration ability

Data Access: Easily consolidate multiple systems for centralized data access

Real-time Reporting: report generation based on user and departments

Industry Solutions: Business Intelligence solutions based on manufacturing, apparel, F&B and healthcare industries

Empower Organizational Performance and Profitability Through Data Visualization & Analytics

Fortude BI technology enhances informed decision-making capabilities within the entire organization. Create customized reports and intelligent dashboards with a holistic view for managing performance against KPIs.

Our dedicated BI consultants use advanced data warehouses and data marts with powerful slice and dice data capability to deliver advanced reports and self-service dashboards and includes:

- End-to-end BI implementation
- Training for administrator, power user and end-user levels
- Post go-live support
- Scoping, consulting, training and custom dashboard development

OUR BI TECHNOLOGIES:

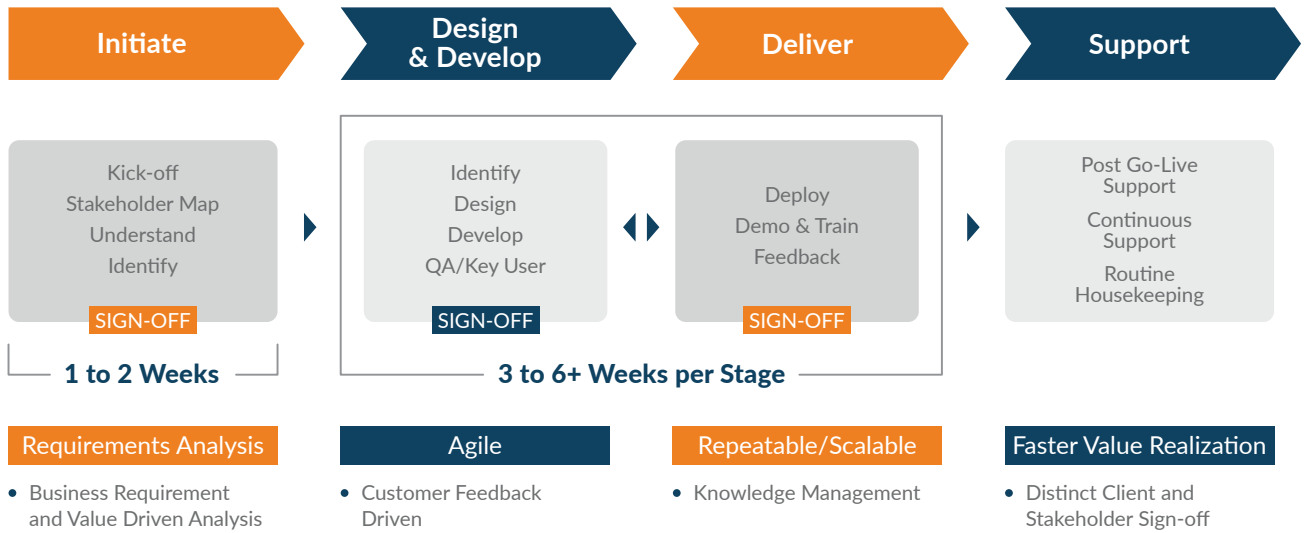

“ Overall, Fortude was a terrific partner. The team was savvy, efficient, and competent.

Katie Walsh | Supply Chain Informatics Manager
Strategic Sourcing - Supply Chain Informatics UC Health, USA
